EDUCATION

Karunya Institute of Technology and Sciences

Bachelor of Technology in Electronics and Computer Engineering (AI and Data Science)

CGPA: 7.35/10

Coimbatore, Tamil Nadu

Aug. 2021 – May 2025

EXPERIENCE

Flutter Developer

Aibuzz Technoventures

Feb 2025 - Present

Remote

- Contributed to multiple app development projects, focusing on UI design, feature implementation, and performance optimization.
- Collaborated with developers to refine app interfaces, ensuring intuitive navigation and a seamless user experience.
- Implemented efficient state management solutions to enhance app performance and reduce unnecessary UI rebuilds.

Flutter Developer

Quamin Tech Solutions LLP

Jan 2025 – Mar 2025

Bangalore, Karnataka

- Contributed to the development of core features for a high-traffic mobile application using Flutter, ensuring seamless performance across both iOS and Android platforms.
- Worked closely with cross-functional teams to implement scalable and maintainable solutions, optimizing user experience and minimizing load times.
- Assisted in debugging and optimizing app performance, identifying bottlenecks, and implementing solutions to improve stability and responsiveness.

PROJECTS

Friend Circle (Flutter, Firebase)

[GitHub Repository](#)

- Built a real-time chat app enabling secure sign-in and registration using Firebase Authentication.
- Implemented Firebase Firestore for storing and managing chat messages efficiently.
- Designed an intuitive, responsive UI with Flutter for seamless user experience.
- Optimized app performance with Firebase services to ensure fast data synchronization.

Minimalistic Weather App (Flutter, OpenWeather API)

[GitHub Repository](#)

- Developed a weather forecasting app using Flutter and integrated with the OpenWeather API for real-time data.
- Designed a smooth, minimalist UI that provides users with a clean, easy-to-read interface for weather information.
- Ensured responsive design across different screen sizes, providing a seamless experience on both phones and tablets.
- Implemented real-time weather updates, including temperature, humidity, and weather conditions based on the user's location.

CERTIFICATES

Google Data Analytics

Coursera

Issued April 2024

Online

Web Development Training
